SUMMARY

Flutter Developer with hands-on experience in building cross-platform mobile applications using Flutter and Dart. Built and published CLVCA, an offline real-time voice translation app on Google Play Store. Published Flutter packages on pub.dev and experienced with Firebase, REST APIs, speech technologies, and scalable mobile application development.

WORK EXPERIENCE

Flutter Developer Intern – Hertzworkz Private Limited

Feb 2026 – Mar 2026

- Developed mobile application features using Flutter and Dart
- Implemented responsive UI components and debugging solutions
- Collaborated with the development team on real-world mobile applications
- Worked with REST APIs and Firebase-based functionalities

Flutter Developer Intern – Levesque Private Limited

May 2026 – Present

- Working remotely on Flutter-based application development
- Developing responsive user interfaces and reusable components
- Collaborating on assigned tasks and maintaining documentation
- Following development workflows and team guidelines

PROJECTS

CLVCA – Cross Language Voice Chat App

- Built and published an offline real-time voice translation application using Flutter
- Implemented Speech-to-Text, Text-to-Speech, and Peer-to-Peer communication for multilingual voice conversations.
- Developed single-device and peer-to-peer translation modes
- Enabled offline language processing using on-device machine learning models
- Designed for multilingual communication and traveler assistance

Sub-Station Guard (SSG)

- Built a Flutter-based fault reporting application for power substations
- Integrated Firebase, media uploads, and GPS-based location tracking

OPEN SOURCE

Chroma Kit – Flutter Package (pub.dev)

- Developed and published a Flutter package for dynamic color manipulation, accessibility utilities, and theme generation
- Provides color blending, contrast ratio calculation, hex conversion, and MaterialColor swatch generation

Chroma Theme – Flutter Package (pub.dev)

- Developed and published an Flutter package for creating Material 3 compliant themes with minimal boilerplate
- Supports dynamic color generation, light and dark themes, and extensive customization
- Designed with a clean and developer-friendly API to simplify theme management

ACHIEVEMENTS

CLVCA Featured by StartupFortune

- CLVCA was featured by StartupFortune for its offline real-time voice translation capabilities
- Recognized for enabling voice translation without relying on cloud services

SKILLS

Mobile Development:	Flutter, Dart
Programming Languages:	Dart, Java, C++, Python
State Management:	Provider
Backend & APIs:	Firebase Authentication, Firebase Firestore, Hive, SharedPreferences, REST APIs
AI & Speech:	Speech-to-Text, Text-to-Speech, On-device Speech Processing
UI Development:	Material 3, Responsive Design, Custom Widgets
Tools:	Git, GitHub, Android Studio, VS Code, Postman

EDUCATION

2023 – 2026	Bachelor of Engineering – Computer Engineering Shatabdi Institute of Engineering and Research, Nashik SPPU
2020 – 2023	Diploma – Computer Engineering Institute of Engineering and Technology, Kannad MSBTE 79.14%
